

# THEODORE C. THEOFRASTOUS

Theodore C. Theofrastous brings a unique perspective to his practice, having worked as both a business architect and an attorney within the technology commercialization and investment fields. Ted counsels clients across a wide range of technologies, including healthcare, communications, IT, alternative energy and advanced materials, in both legal and business issues.

In addition, Ted works with non-profits and research institutions to develop and implement sustainable governance and policy structures to help achieve strategic organizational priorities. Ted has extensive experience in technology transfer within the advanced research community, where he counsels large institutional clients on the development of legally compliant approaches to government and industry-funded research, licensing and equity transactions.

Prior to joining KJK, Ted founded his solo practice and an affiliated technology strategy consulting firm. He also previously served as managing director and fund counsel to an investment firm and Chief Commercialization Counsel at the Cleveland Clinic Foundation.

Ted's background in business includes more than 20 years working as a technologist, executive and board member to design and implement new and re-engineered products and business systems and related investment.

Ted holds a Bachelor of Arts degree in history from Marlboro College in Vermont and earned his Juris Doctorate from Case Western Reserve University School of Law. Outside of his practice, Ted is an adjunct professor of Law and Engineering at CWRU. He has served as a Distinguished Practitioner in Residence at Case since 2010 and is Director and a co-founding faculty member of CWRU's FUSION Certificate Program, a multidisciplinary graduate certificate program aimed at the cultivation and commercialization of technology from the blended perspectives of law, management and science. Ted has also authored several peer-reviewed articles on a range of technology and legal topics. He frequently speaks on topics in the field of technology commercialization, regulation and finance.

In his free time, Ted enjoys SCUBA diving around the world, mountain biking and long-haul road cycling, genealogy and cooking. Additionally, he is a member of the Chevaliers du Tastevin, an international Burgundy Wine association, headquartered in Bourgogne, France.

Member

## REPRESENTATIVE EXPERIENCE

### Representative Investment and Securities Matters

- Design and support more than \$100 million in securities offerings between  
venture capital funds, private investors and early-stage ventures
- Design and structure the private placement of equity securities and technology  
transfer arrangements for a range of life science start-up companies sponsored  
by the Cleveland Clinic Foundation
- Serve as outside investment and fund counsel for several small, privately held  
funds investing in early-stage technology startups
- Structure and implement a series of Qualified Opportunity Zone funds investing  
in complex technology startups and commercial real estate
- Draft offering and transactional materials for over USD \$2 billion in international  
placements of interests in private equity fund offerings in the United States, the  
Cayman Islands, the Channel Islands and Germany

### Complex Technology Commercialization and Industry Initiatives

- Serve as outside general and transactional counsel to dozens of complex  
technology-based startup ventures
- Build and implement a startup program resulting in a portfolio of more than  
a dozen early-stage venture offerings based on research developed at the  
Cleveland Clinic Foundation
- Draft and negotiate numerous technology transfer transactions involving an  
array of intellectual property, equity and royalty exchanges between research  
institutions, startups, non-profit technology partners and large industrial  
concerns
- Design and implement intellectual policy development, technology evaluation  
and tech transfer operations for a pre-eminent children's hospital
- Design and lead legal and strategy components of a large regional hospital  
system in the development of intellectual property policies and internal  
operations related to industry collaborations and technology transfer
- Develop and implement master research frameworks for technology-focused  
non-profit and government research operations

### Other Representative Initiatives & Transactions

- Structure and develop a national non-profit investment fund focused on  
economic development through investment in early-stage technology startups by  
philanthropic, state government and community stakeholders
- Plan and develop translational and applied technology accelerators and shared  
scientific resource centers in partnership with a range of regional economic  
development, state and federal stakeholders
- Develop and implement a technology commercialization network to organize and  
streamline technology opportunity assessments arising from university research  
aimed at the Air Force Research Laboratories and NASA
